

ENNAGONA

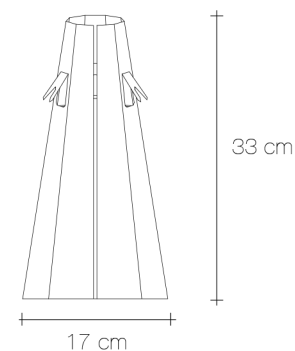

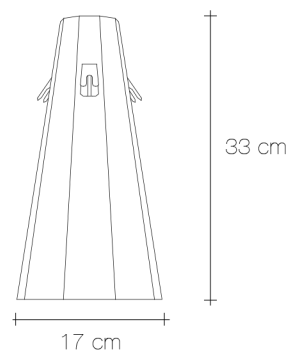

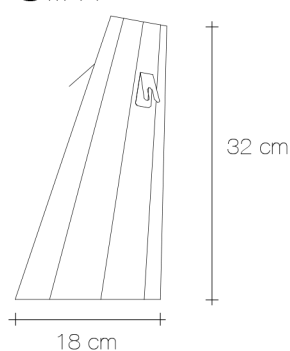

Corpo ennagonale in bilico tra geometria e gravità. L'apparente imperfezione del suo taglio si risolve una volta appeso al soffitto.

Poligono a nove facce estruso e rastremato in alluminio piegato, questa lampada a sospensione è regolabile in altezza semplicemente avvolgendo il filo intorno alla forma metallica.

A body with nine angles suspended between geometry and gravity. An apparently crooked profile that finds its balance once suspended mid-air. ENNAGONA is an extruded and tapered nine-faced polygon made of aluminum. The height from the ceiling can be adjusted by simply winding the cord around the metal body.
